## AGENDA SUPPLEMENT

---

---

**TO: Mayor Bart and Village Board**

**FROM: Brad C. Fink, Director of Public Works**

**FOR: October 18, 2016 Regular Village Board Meeting**

**RE: Village of Wauconda Wastewater Collection & Treatment Asset Management Plan**

---

**Background.** During the strategic planning process, “Continue Building Excellence in Village Governance” was identified as one of the three main strategic initiatives on which to focus Village resources. As a result, the Village recently finalized an asset management plan for the wastewater collection and treatment infrastructure.

Asset management is a planning process that ensures that the Village is getting the most value from our assets and has the financial resources to rehabilitate and replace them when necessary. Moving forward, this plan will be critical in the further development of the Village’s Capital Improvement Plan. The benefits of an asset management plan are:

- Planning for replacement and rehabilitation reduces system “down-time” and the number of emergency repairs.
- Prioritizing rehabilitation and replacement needs provides time to research cost-effective alternatives.
- More effective and efficient use of the public money.
- Providing greater access to financial assistance. Some funding sources give applicants higher priority ratings for having an asset management plan.

Staff feels this effort supports the strategic mission by improving the effective and efficient operations of one of the Village’s largest assets. In turn, well-managed infrastructure will contribute to increased public confidence in the entire organization. RHMG Engineers, Inc. will be providing a brief presentation on the finalized Village of Wauconda Wastewater Collection & Treatment Asset Management Plan.
